General advice
Immediately remove contaminated clothing, take care not to contaminate

unaffected areas.

Inhalation Contains component irritating by inhalation. Move the exposed person to fresh

air. Seek medical attention.

Eyes Rinse immediately with running water for at least 15 minutes holding the eyelid

open; consult an eye specialist.

Skin Wash thoroughly with water and soap

If skin irritation or rash occurs get medical attention (P333+P313)

Ingestion Immediately rinse the mouth with water and drink plenty of water. Obtain

medical attention immediately, show this safety data sheet.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms Eye contact- May cause temporary eye irritation.

Risks No information available

4.3 Indication of any immediate medical attention and special treatment needed

Treatment Treat according to symptoms (decontamination, vital functions), no known

specific antidote.

SECTION 5: FIRE FIGHTING MEASURES

5.1 Extinguishing media:

Suitable: CO2 or dry chemical spray, water spray may help to reduce the temperature and

extinguish flames.

Unsuitable: High pressure water jet.

5.2 Special hazards arising from the mixture

Harmful vapours. Thermal decomposition or burning may release toxic oxides of nitrogen and other toxic gases.

5.3 Advice for fire fighters

Use full protective clothing and self-contained breathing apparatus.

Further information: The degree of risk is governed by the burning substance and the fire conditions. Contaminated extinguishing media must be disposed of in accordance with official regulation.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal Precautions, protective equipment and emergency procedures

Use personal protective clothing.

6.2 Environmental Precautions

Prevent contamination of soil, drains and surface waters. Do not discharge contaminated water/ fire-fighting water into drains/ surface water/ groundwater.

6.3 Methods and material for containment and cleaning up

Collect spillage (P391) by sweeping or industrial vacuum cleaner. keep in suitable closed container for disposal

ventilation of stores and work areas. For PPE see section 8 Contaminated clothing should not be allowed out of the workplace (P272). Wash contaminated clothing before reuse

(P363)

Advice on protection Normal measures for preventive fire protection

against fire and explosion Take precautionary measures against static discharge

7.2 Conditions for safe storage, including any incompatibilities

Keep containers tightly closed. The powder should be stored under cover, in a well ventilated, cool, dry place and away from direct sunlight or heat.

Protect from temperatures below: Not applicable

Protect from temperatures above: 35 °C

Suitable storage materials: Original containers.

Higher temperatures and humidity will reduce the shelf life of the product and may cause the powder to form lumps. The powder will also be difficult to mix into a paste.

Under normal conditions (21°C) a shelf life of 12 months or more is possible.
