Use personal protective clothing.

### **6.2 Environmental Precautions**

Prevent contamination of soil, drains and surface waters. Do not discharge contaminated water/ fire-fighting water into drains/ surface water/ groundwater.

### **6.3 Methods and material for containment and cleaning up**

Collect spillage by sweeping or industrial vacuum cleaner. keep in suitable closed container for disposal

### **6.4 Reference to other sections**

For personal protection see section 8 and disposal section 13

## SECTION 7: HANDLING AND STORAGE

### 7.1 Precautions for safe handling

Advice on safe handling Avoid the formation and deposition of dust. Use only outdoors or in a well-ventilated area (P271). For PPE see section 8.  
Wash contaminated clothing before reuse (P363)  
Advice on protection Normal measures for preventive fire protection  
against fire and explosion Take precautionary measures against static discharge if using plastic packaging.

### 7.2 Conditions for safe storage, including any incompatibilities

Keep containers tightly closed. Store locked up (P450), under cover, in a well ventilated, cool, dry place and away from direct sunlight or heat.  
Protect from temperatures below: Not applicable  
Protect from temperatures above: 40 °C  
Suitable storage materials: Original containers.  
Higher temperatures and humidity will reduce the shelf life of the product and may cause the powder to form lumps. The powder will also be difficult to mix into a paste.  
Under normal conditions (21°C) a shelf life of 12 months or more is possible.
