

### **CAPPING CEMENT SPECIFICATION**

Grade Name: K64/M

**Applications:** High performance incandescent grade upto 150 watts with

2500 hours lamp life. Can also be used for decorative and

reflector lamps.

Physical appearance:

Slightly gritty off white powder Powder appearance:

Smooth light green coloured paste Paste appearance:

Cured appearance: Light straw coloured expanded solid

Physical properties:

Solvent: ethanol (94%)

Powder:solvent ratio: 10.0 L/100Kg powder @ 23°C

275 - 325 (+/- 5) 10ths/mm paste penetration @ 23°C Viscosity:

1.15 g/cm<sup>3</sup> (tapped) Powder density:

Paste density: 1.9 - 2.1g/cm<sup>3</sup>

Average expansion: 65 %

Moisture resistance: aood

Paste storage life: 6 weeks Stored in sealed containers @ 21°C

(Note - Higher temperatures reduce life)

Powder storage life: 12 months

The above properties are given for guidance purposes only. Individual customer requirements should be assessed prior to the use of cement. Technical assistance and test methods are available on request.

#### Health and Safety data sheets are available upon request

The information contained on this specification sheet is given in good faith and does not constitute a warranty or guarantee for the customer. Customers are advised to ensure that all products are thoroughly tested to ensure suitability for the intended application.

### **Capping cement information**

# Recommended cleaning solvent:

Ethanol, isopropanol

## Recommended mixing sequence:

- 1. Place alcohol in mixing vessel
- 2. Add half of powder
- 3. Mix for 5 minutes\*
- 4. Add remainder of powder5. Mix for a further 15 minutes\*
- 6. Allow to stand for 1 hour before use

\*mixing times vary

## Recommended mixing machines:

Hobart Winkworth Z Blade type Bowers Molteni

# Recommended quantity of paste by cap type\*: (for quidance only)

T8
----

#### **Curing Parameters:**

As cement curing is influenced by paste weight, curing temperature and time, precise figures cannot be given.

For guidance purposes:

2 grams of paste @200°C will cure in 35 - 40 seconds 2 grams of paste @160°C will cure in 150 - 160 seconds

Prolonged exposure of curing cement to temperatures above 250°C should be avoided

The above properties are given for guidance purposes only. Individual customer requirements should be assessed prior to the use of cement. Technical assistance and test methods are available on request.

#### Health and Safety data sheets are available upon request
