

CAPPING CEMENT SPECIFICATION

Grade Name: SJE522					
Applications:	Grade for incandescent lamps required to stand 2500 hours at 210°C. Can also be used for HEI, decorative and reflector lamps.				
Physical appearance:					
Powder appearance:	Fine off white powder				
Paste appearance:	Smooth light green coloured paste				
Cured appearance:	Light straw coloured expanded solid				
Physical properties:					
Solvent:	ethanol (94%)				
Powder:solvent ratio:	7.5	L/100Kg powder @ 23°C			
Viscosity:	275 - 325 (+/- 5)	10ths/mm paste penetration @ 23°C			
Powder density:	0.9 - 1.1	g/cm ³ (tapped)			
Paste density:	2.0 - 2.2	g/cm ³			
Average expansion:	100-140	%			
Moisture resistance:	good				
Paste storage life:	6 weeks	Stored in sealed containers @ 21°C			
Powder storage life:	12 months	(Note - Higher temperatures <u>reduce</u> life) See below			
The above properties are given for guidance purposes only. Individual customer requirements should be					

The above properties are given for guidance purposes only. Individual customer requirements should be assessed prior to the use of cement. Technical assistance and test methods are available on request.

Health and Safety data sheets are available upon request

The information contained on this specification sheet is given in good faith and does not constitute a warranty or guarantee for the customer. Customers are advised to ensure that all products are thoroughly tested to ensure suitability for the intended application.

<u>Powder Storage</u> <u>conditions:</u>	Keep containers tightly closed, store in a cool dry place ou of direct sunlight. Under normal conditions (21°C) a shelf life of 12 months is possible. Higher temperatures and humidity will reduce shelf life resulting in poor paste formation and may cause the powder to form lumps.		
<u>Recommended cleaning</u> solvent:	Ethanol, isopropanol		
<u>Recommended mixing</u> sequence:	 Place alcohol in mixing vessel Add half of powder Mix for 5 minutes* Add remainder of powder Mix for a further 15 minutes* Allow to stand for 1 hour before use *mixing times vary 		
<u>Recommended mixing</u> machines:	Hobart Winkworth Z Blade type Bowers Molteni		
Recommended quantity of paste by cap type*: (for guidance only)	B22d E27 B22d E14 B15d T8 T10 T12	1.5 - 1.7 g 1.6 - 1.8 g 1.2 - 1.4 g 0.9 - 1.0 g 0.9 - 1.0 g 0.8 - 1.2 g 1.3 - 1.5 g 1.6 - 2.0 g	
<u>Curing Parameters:</u>	temperature and tin For guidance purpo 2 grams of paste @	s influenced by paste weight, curing me, precise figures cannot be given. ses: 2200°C will cure in 35 - 40 seconds 160°C will cure in 150 - 160 seconds	
Prolonged exposure of	curing cement to tempe	ratures above 250°C should be avoided	
assessed prior to the use of cement	. Technical assistance a	Individual customer requirements should be nd test methods are available on request. The available upon request
